

ALL-N-ONE SECURITY MODULE

PRODUCT BRIEF

COMPLETELY INTEGRATED MANAGED
ENTERPRISE UTM SOLUTION FOR
SMALL TO MEDIUM BUSINESS

The ASM enables sharing of information between security applications and appliances, greatly reducing IT complexity and providing all security applications with superior performance, operational ease, and a significant reduction in TCO.

It's a scenario all too common in today's corporate IT departments.

IT security teams are forced to implement security systems by cobbling together discrete security appliances and applications from competing security companies. Because these products focus on various specific aspects of network security, the IT department itself must provide the central management functions of integrating, managing, monitoring and correlating discrete security events, alerts, logs and reports into actionable security threats.

While there are several UnifiedThreat Management (UTM) products on the market, they are inadequate to meet the robust network security needs and requirements of the enterprise market.

The All-n-One Security Module (ASM) from Global DataGuard is different.

Specifically designed for small to medium enterprises, the ASM defines a new category of security product—Enterprise UnifiedThreat Management (Enterprise UTM). The ASM consolidates the myriad of network security appliances, expands network security coverage, and provides a truly integrated network security suite.

THE GLOBAL DATAGUARD ASM UNIFIES 12 SECURITY APPLICATIONS INTO A SINGLE APPLIANCE:

1. Firewall
2. IPSEC VPN
3. Intrusion Prevention System
4. Intrusion Detection & Correlation
5. Gateway Antivirus
6. Gateway AntiSPAM
7. Content Monitoring & URL Filtering
8. Network Behavioral Analysis (NBA) & Correlation
9. Network Access Policy & Monitoring Capability
10. Threat Management System
11. Vulnerability Management
12. Log Management & Monitoring

COMPLETE, COMPREHENSIVE SECURITY SOLUTION

- **Innovative**—The ASM is the price/performance leader and first to market in Enterprise UTM.
- **Proven**—Industrial grade ASM applications have been running in the LME/MNC market for many years, representing proven technology that is designed to scale.
- **Versatile**—The ASM's architecture is designed to incorporate emerging technologies and applications.
- **Cost Effective**—The ASM offers a compelling and unmistakable cost reduction and Return On Investment (ROI) that is easily offered as a managed service or a native implementation.

The ASM's underlying Network Behavioral Analysis (NBA) and Correlation function enables sharing of information between security applications and disciplines, and lies at the heart of Global DataGuard's innovative architectural approach. The ASM gives all security applications the behavioral edge, providing superior performance, operational ease, and a 70% reduction in Total Cost of Ownership (TCO).

FAST RETURN ON INVESTMENT

The ASM is priced to compete with existing UTM products, offering a compelling and unmistakable cost reduction and ROI. It can be used as either a managed service or a native implementation.

UNIQUE NETWORK BEHAVIORAL ANALYSIS CAPABILITY

- Shares results with all ASM security applications
- Retains and correlates suspicious raw packet data for rolling 14-30 days
- Correlates alerts for up to 6 months and maintains behavioral profiles for up to 2 years
- Automatically adapts to evolving networks using its predictive functionality

AVAILABLE ASM MODULES

Model: N-2500-S

- 10/100/1000Mb
- On premise appliance
- 1U Rackmount Form Factor
- Core 2 Duo Processor
- Ideal for small businesses

Model: N-2501-S

- 10Mb
- On premise appliance
- 1U Rackmount Form Factor
- Dual Dual-Core Xeon® Processors
- Ideal for medium-sized businesses

Model: N-2510-S

- 100Mb
- On premise appliance
- 1U Rackmount Form Factor
- Dual Dual-Core Xeon® Processors
- Ideal for medium-sized businesses

Model: N-2520-S

- 1000Mb
- On premise appliance
- 1U Rackmount Form Factor
- Dual Dual-Core Xeon® Processors
- Ideal for medium-sized businesses
